

AI Job Assistant

Upload Company Excel

Please read before uploading:

- Max **20 companies per upload**. Only **one upload per hour** is allowed.
- Max **100 companies scraped per 24 hours** (across all uploads).
- Scraping strictly **respects robots.txt** and site rules, including **Crawl-delay**.
- There are **delays between all requests** to avoid overloading servers.
- If a site shows a captcha or blocks scraping, it is skipped and scraping is paused if needed.
- All scraping activity is **logged for transparency**.
- Any company can **request data deletion** at any time (see below).
- See the [Ethical Use Policy](#) for full details.

Excel Format Guide: The file should have the following columns (in order):
Company Name, URL, Keywords (comma-separated), Location.
Example row: Acme Corp | https://acme.com/careers | python, data, ai
| New York

Choose File No file chosen

Upload & Generate
Config

✓ After upload: Your Excel will be checked for format and limits. If valid, a config is generated and you can start scraping jobs.
🗑 **Data Deletion:** If a company requests data removal, contact the maintainer and all related data will be deleted promptly.
